We recognise the huge importance of protecting this planet for the generations to come. We make clothes for those people who are happiest outdoors, on a wave or on a mountain. So it's part of our mission as an outdoor brand to ensure that we do what is necessary to protect our environment. In the FW2020 we announced we were taking the steps necessary to Green Up the way we work. We reviewed and improved the way our garments were made, using sustainable fabrics and following green practices. After our journey to Green Up, sustainability now forms an integral part of our collection. The clothing within our collection that is either made using sustainable fabrics or processes has the PVRE Green label. PVRE Green is our commitment to this wonderful planet. For the FW22/23 winter collection nearly all of our new men's jacket styles are made using recycled polyester, created by spinning PET bottles into technical yarn. With every season we will continue to evaluate how we can work more sustainably for a better tomorrow. Together to green

**PVRE  
GREEN**

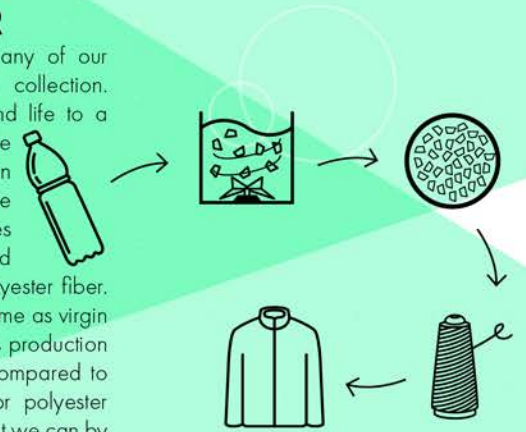

## RECYCLED POLYESTER

We use recycled polyester in many of our garments in our PVRE Green collection. Recycled polyester gives a second life to a material that's not biodegradable and would otherwise end up in landfill or the ocean. To produce this material, used plastic bottles and other PET plastics are melted down and re-spun into a new polyester fiber. Recycled polyester is almost the same as virgin polyester in terms of quality, but its production requires 59 percent less energy compared to virgin polyester. With demand for polyester constantly rising, we are doing what we can by using this alternative to virgin polyester.

For those who want to get the most out of life, we've designed this series of all-weather essentials. These pieces have a contemporary street edge combined with hidden functionality. This is clothing that you can wear on your bike ride to work, ice skating on the lake or for when you're strolling through the city. These pieces fit seamlessly over your city outfit, while also gearing you up for taking on the outdoors. Longer length jackets have 10K or 20K water resistance and breathability meaning you'll get to your destination comfortable and dry. Quilted jackets add insulation. The fabrics are technical and water-repellent zippers are used to create additional ventilation as well as aiding movement. City looks that have you ready for wherever the days take you.

# CITY

Between the snow-capped mountains and the ocean, there are wonderlands to discover. More and more people are heading outdoors, taking on all weather to be part of that wilderness. We've created this line of outdoor essentials that will have you ready for the adventure ahead. Whether you're running the trail, ice skating or simply hiking through the woods, these pieces will enhance your activity. And here at Protest we believe that you don't have to sacrifice style in the creation of functional clothing. We have fused street looks with our technical know-how. There are raincoats, softshell jackets and trousers to keep you dry. The jackets offer varying degrees of water resistance and breathability. The clothing is made from quality technical fabrics, with water-repellent zippers and reflective details. Some pieces have extra ventilation to assist in moisture control. Also in this collection there are quilted jackets, which you can pair with the raincoats and softshell layers for that extra layer of insulation. Be prepared with Protest.

# PRINTS

Here at Protest we are known for our awesome prints and this season is no exception. Plaid designs are made for the winter and we have printed this design on the prtBAIKAL, a quilted jacket with some serious street edge. The prtGENEVA anorak has a plaid design on the sleeves. We've got a fantastic geometric design inspired by the Polar Regions and we've printed that on the prtTAYMYR fleece and the prtCOMO anorak style winter jacket. Accessorize with our prtSENECA snood, beanie prtEILDON and prtEACHAM suspenders all in the same geometric print. We've also taken the classic camouflage design and created a print that you see on the cool prtVOSTOK winter jacket. All of these jackets are part of our sustainable PVRE Green label. They are made using recycled polyester.

prtBAIKAL  
6711922

# TEXTURE & SHINE

Important themes for this season's collection are texture and shine. We're not just focussed on how something looks; we're also focussed on the way it feels. This collection has structured fabrics like ribbed velvet. Check out our PRTCANNA. We're crazy about this fabric - it looks and feels amazing and it's also got 10K water resistance and breathability to boot! Our peach quality PRTASPEN has detachable arms so that it becomes an awesome body-warmer. Bringing some shine to the collection, the PRTCYRESS winter jacket is a glorious mix of tough and feminine with a glossy 10K outer fabric combined with a grey melange hood. And we have a range of fleeces that will make you want to layer up.

We're not talking about your grandma's quilt! This is the kind of quilting in which you use stitching to create lightweight insulation. Quilting is a great way to bring not only extra warmth, but also structure and pattern. We've been playing around with stitching to create some great new looks for this season. Both the PRTKERRIA and PRTPEONIES have quilting and are part of our PVRE Green series as they are made using recycled polyester. The PRTSUMAC has quilted arms. The PRTSILENE are quilted mittens, the perfect accessory for adding warmth and texture to your winter outfit.

## **NEW IN STOCK**

There are new styles in STOCK. STOCK are our bestsellers, the styles that have such timeless appeal that we ensure that they are available all year round. We regularly introduce pieces that we believe in. This season for the women it is the PRTHOLLY and the PRTSUNNA, both slim fit salopette styles with 10K water resistance and 10g breathability. For the men this winter, we have two long length jacket styles, the PRTHALLSTATT and the PRTMELTIN as well as the 10K regular fit PRTMOWEN ski and snowboard trousers.

# NXG

BY PROTEST

A photograph of two young women standing in a long, narrow hallway with high wooden ceilings and walls. The woman on the left has blonde hair and is wearing a black long-sleeved top. The woman on the right has curly brown hair and is wearing a bright orange long-sleeved sweatshirt with a small 'NXG' logo on the lower left chest, and blue jeans. They are both looking towards the camera. The hallway has a series of windows on the left side and a green exit sign on the wall. The lighting is warm and focused on the subjects.

We founded NXG in 2020 to bring a new dimension to streetwear. NXG stands for 'Next Generation' and it is the fusion of street edge with quality details. This season we've raised the bar, experimenting with new fits, fabrics and colours. We have the quilted jackets as well as lots of many fantastic fleece styles and pieces made from soft velour fabrics.

# Corporate Social Responsibility

Corporate Social Responsibility or CSR is our way of taking responsibility for the impact that our business has on people, the environment and the society as a whole so it's linked to sustainability as well as ethical work standards. As part of our continued efforts to improve our sustainability, we are reviewing and improving the way our garments are made. Within the production process, we are striving for more people-friendly and green practices. Here is how we are achieving this:

- Protest is a member of **Amfori BSCI**. The goal of this organisation is to improve social performance in global supply chains. This means we offer safe, humane working conditions and fair pay. There is no child labour.
- Protest complies with the **REACH** standard, which addresses the production and use of chemical substances. We don't use fabric dyes like AZO or PFC treatments that are harmful to people and animals. We have our products tested at **Textile Lab** and **Bureau Veritas**.
- As part of our effort to improve our sustainability, our collection consists a range of materials, from recycled polyester and nylon to sustainable bamboo and organic cotton, made with minimal impact on the environment. We have used REPREEVE materials for thermal layers and a fabric, which fuses coffee grinds with recycled polyester, for outerwear. We use Oeko-Tex standard 100 fabrics. For our packaging, we use recycled cardboard and plastic.
- We are striving to remove all PFC's from our collection. PFC's or perfluorinated chemicals are used to waterproof garments but PFC's are virtually non-degradable in nature. We have found an eco-friendly replacement for PFC's, inspired by water repellents found in nature.
- As of the spring/summer 2022, we are using the Higg index to assess the social and environmental impact of our supply chain. This index allows us to achieve measurable results and track our improvements. Every part of our process is followed and assessed from the management system to transport and distribution. This measure will help us pinpoint areas that need attention and help us improve our sustainability.
- We care about animal welfare; we use alternatives to real duck down and we never use real fur or angora wool.
- Our products are transported by sea in an effort to reduce our carbon footprint. Transport by truck or by air would be one hundred times as much.
- Our head office in the Netherlands is powered by our own supply. Ten thousand solar panels have been placed on the roofs of our buildings, putting us in the Top 10 of the largest solar panel surfaces in the Netherlands. Today we don't just produce enough for our own energy needs; we also put electricity back in the system.
- Our clothing is designed to last a really long time; we choose durable materials and well made constructions to reduce the need to buy more and thereby reducing the impact on the environment.

With every day we realise the effects that we as humans are having on this earth. In order to keep living our mantra 'to get there', we need to do all we can to protect the environment that we call home. Join us on our journey to a greener tomorrow.

**ALL  
YEAR  
LONG**

What's STOCK? It's a range of ski and snowboard essentials that we have available all year round. Classic necessary designs that fit seamlessly into the current collection for men, women and kids. Our STOCK items include a compact collection of reliable functional snow trousers and jackets as well as thermal layers like the HUMANS and WILL for men and the FABRIZM and the MUTEZ for women. This season our STOCK items have been updated in a range of on-trend colours.

WAIST	52 - 54	54 - 56	56 - 58	59,5 - 62,5	63,5 - 66,5	67 - 69	69 - 71
HIP	58 - 60	61,5 - 64,5	66 - 70	72 - 76	78,5 - 82,5	84,5 - 89,5	92,5 - 97,5

## KIDS JACKET FITS

### REGULAR FIT

is our standard, time-tested fit; ergonomically preshaped and sized well to allow for layering and ensure good range of motion.

### BOMBER FIT

jackets are waist length and have fitted hem and cuffs.

### SLIM FIT

jackets fits closer to the body than regular fit jackets.

### REGULAR LENGTH

jackets have hem that ends below the hipbone.

### LONG LENGTH

jackets offer more length in the body.

## KIDS BOARDPANTS FITS

### REGULAR FIT

is our standard, time-tested fit; ergonomically preshaped and sized well to allow for layering and ensure good range of motion.

### RELAXED FIT

is our standard, time-tested fit; ergonomically preshaped and sized well to allow for layering and ensure good range of motion.

### SLIM FIT

is snuggler in hip area than regular fit with shaped legs.

# ICON OVERVIEW

 PVRE Green	 high collar	 chin protector	 stretch fabric	 Slim fit
 PVRE series	 fixed hood	 YKK zipper	 ergonomical pre-shaping	 tailored fit
 PFC FREE	 detachable hood	 water repellent zippers	 regular waist gater	 regular fit
 GREEN	 helmet compatible	 two-way zipper	 stretch waist gater	 relaxed fit
 recycled material	 regular beanie fit	 elastic waistband	 removable waist gater	 loose fit
 20K	 relaxed beanie fit	 half elastic waistband	 no waist gater	 short length
 10K	 x2	 fixed waistband	 vent zippers	 REGULAR LENGTH
 SOFT SHELL	 fleece band lining	 waist gater attachment system	 goggle pocket	 HIGH LENGTH
 FULL TAPING	 fleece band lining	 detachable shoulder straps	 goggle cleaner	 LONG LENGTH
 CRITICAL TAPING	 LYCRA	 adjustable waistband	 PASS	 EXTRA LONG LENGTH
 reflective detail	 VELCRO	 NO SLIP	 BEMBERG SOFT LINING	
 SPACE TO GROW	 HOOK AND LOOP	 zipped bottom leg	 1 WAY CLIMA SHIELD	

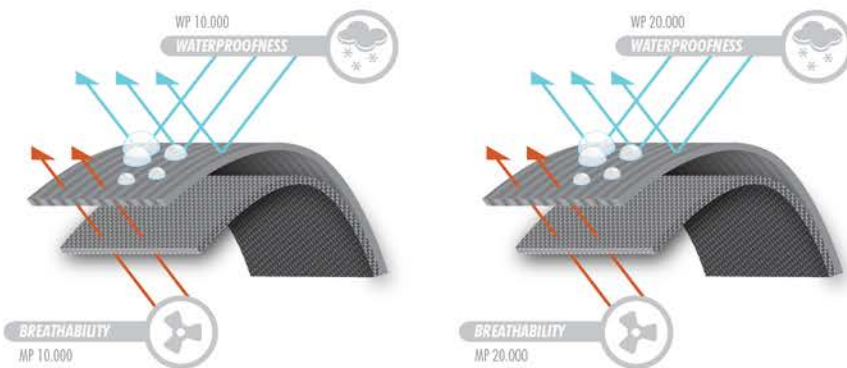

# GEOTECH

## WATERPROOFING AND BREATHABILITY

Your functional outerwear needs to make a little magic. It needs to be breathable and at the same time, waterproof. The heat and moisture generated by your body as you ski or snowboard should be able to escape. At the same time, the moisture on the outside of your outerwear needs to be kept out.

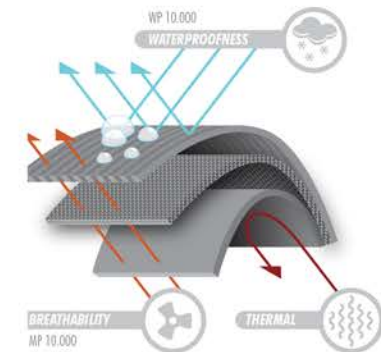

How waterproof and breathable outerwear is, is expressed in two numbers. The first is in millimeters (mm) and is a measure of how waterproof a fabric is. In the case of a 10K or 10.000mm fabric this means you can place a square tube with inner dimensions of 30mm x 30mm over the outer fabric and you could fill it with water to a height of 10.000mm before water would begin to seep through. The higher this number, the more waterproof the fabric. 5000mm is low waterproofing, 10.000mm is average and 20.000mm is high.

The second number is a measure of how breathable the fabric is, and is measured in grams (g) of water vapor, which can pass through a square meter of the fabric from the inside to the outside in a 24-hour period. In the case of a 20K (20.000g) fabric, this would be 20.000 grams. The larger the number, the more breathable the fabric, meaning that 5.000g is low and 20.000g is very breathable.

## SOFTSHELL

What is a softshell? It's comfortable, flexible, wind and water-resistant. The fabric is made out of three layers. The outer layer is water-repellent and stretchy. The middle layer is both water and wind resistant as well as being breathable. The inner layer that is closest to the body is brushed providing soft and comfortable insulation. The big difference between hard shell and softshell outerwear is the breathability. Softshell is extremely breathable, making it perfect for physical activity.

## INSIDE

### METHODS IN INSULATION TECHNOLOGY

- 3M Thinsulate featherless loose-fill insulation, unique high-loft microfibers, breathable, water-resistant, quick drying and durable ensuring a high-end comfortable insulation for all conditions.
- Feathertouch insulation, a high-loft insulator providing in-depth warmth by high-volume structure capturing air in small pockets.
- High-loft Thermax insulation, a premium insulator combining high mobility with volume and low weight ensuring comfortable warmth under all conditions.
- Thermax insulation, a regular high-end insulator combining high mobility with low weight ensuring comfortable warmth at all times.

### SEALED SEAMS

Rather than just stitched together, seams can also be taped on the inside. Taped seams are where tape is applied to a garments seam and sealed using heat. For outerwear to be highly waterproof the seams need to be treated in this way. This will stop water coming through the stitching. Critically taped seams are when the most important seams have been taped which tends to be the hood, neck and shoulders in jackets and the waist and knees in trousers.
